

Arwa Hamdy Mohammady

DATA SCIENTIST & AI ENGINEER

Phone: +20117211766 | Banha, Egypt | E-mail: arwahamdymo1042004@gmail.com

LinkedIn: www.linkedin.com/in/arwa-hamdy-a7b1822a3

GitHub: <https://github.com/Arwa-Hamdy-Mohammdy>

SKILLS:

- **Machine Learning:** Supervised & unsupervised learning, model evaluation, hyperparameter tuning
 - **Data Analysis & Processing:** Data cleaning, preprocessing, handling missing values, feature engineering basics, statistical analysis (descriptive statistics, probability, hypothesis testing), exploratory data analysis (EDA), and data visualization for insights and decision-making.
 - **Analytical Thinking:** Pattern recognition, anomaly detection, predictive modeling, optimization.
 - **Computer Vision:** Image preprocessing, feature extraction, basic image classification concepts using Python libraries.
 - **Natural Language Processing (NLP):** Text preprocessing, tokenization, basic text classification and sentiment analysis concepts.
-

EDUCATION:

B.Sc. in Electrical Engineering ,Communications and Computer Engineering (Expected Graduation at 2027)
Banha University, Egypt

VERY GOOD

PROJECTS:

Liver Cirrhosis Prediction: (<https://github.com/Arwa-Hamdy-Mohammdy/Liver-Cirrhosis>)

- Processed 100+ medical records to predict Liver Cirrhosis stages.
 - Achieved 95%+ accuracy using lightgbm and XGBoost models.
 - Tuned 50+ hyperparameters to improve model performance and generalization.
 - Analyzed 15+ clinical features, including Edema, Albumin and Cholesterol.
-

Diabetes Prediction: (https://github.com/Arwa-Hamdy-Mohammdy/Diabetes_Prediction)

- Processed 100+ medical records to predict the existence of Diabetes .
 - Achieved 97%+ accuracy using RandomForestClassifier and XGBoost models.
 - Reduced training time by 30% through feature selection.
 - Analyzed 15+ clinical features, including Diet Style, hypertension and heart_disease.
-

EXPERIENCES:

1)Graduated from **DEPI** – Data Science & AI Track (Round 2, 6 months)

Graduation Project: <https://github.com/Arwa-Hamdy-Mohammdy/Health-Care-Project>

2)Graduated from **KAITECH** – Programming for Engineers Track (4 months)

Tasks: https://github.com/Arwa-Hamdy-Mohammdy/KAITECH_TASKS

3)Trainee at **DataCamp GDSC** (1 year)

Completed multiple courses in data analysis, Python, and machine learning.

4)Machine Learning Intern – **Elevo**

Worked on real ML projects such as loan approval prediction, feature engineering, and model evaluation.

5)Machine Learning Trainee – **ITI (Information Technology Institute)**

Hands-on training in data preprocessing, model building, and evaluation using Python.

6)Data Science Trainee – **NTI (National Telecommunication Institute)**

Focused on statistical analysis, visualization, and applied ML techniques for business data.

7)Trainee at **DEPI** – Microsoft Machine learning (Round 4, still)

COURSES:

Python & problem solving (Udemy)

Study English at level B1D (AUC)

C++ & problem solving (GDSC Zagazig)

Bootcamp Banha (Data science & AI)

CERTIFICATES:

Certificates for courses and bootcamps can be found:

(https://drive.google.com/drive/folders/1OW2KQRgkpWQ1aM_CCU-A7MtWBabTLRD)

VOLUNTEER WORK:

1) Active member in the **Skills Area of the Development** Committee, contributing to event coordination and skill development programs.

2)Active member at **Paradox ISAC contributing with NASA**

3) Vice Head (AI Track) at **SIC**

4)Core Team at **GDG** Benhe (AI Track)

5)Vice Head Logistics at **3abassy**
